

Telaithrion Project – Supporting Campaign

Collecting resources for the construction of the central dome of the community!

What is the Telaithrion Project?

The Telaithrion project aims to create the first, much needed, eco-community in Greece, which will serve as an exemplar model of sustainability, harmony, and healthy living conditions, and with respect to human values and the ecosystem. We want to utilize renewable sources of energy, clean and efficient transportation, and continuously research major aspects of human community like technology, education, non-violent communication, energy, etc, which will be available for all.

Through this campaign, and of course with your invaluable support, we aim to make a major step towards our goals, as funds are being raised for the construction of the central Geodesic Dome, the very heart of the community, which will be constructed during Spring 2012. With a size of 100 square meters we will immediately be more capable of hosting larger and more frequent seminars, practical workshops, skill-sharing events, eco-conferences, sustainability festivals and many more.

Practically we will be one step closer to the dream, and much needed practical knowledge and information will be flowing much easier!

The Impact and Why Now?

The stress that is put upon our planet today leaves us no other option than to redesign our culture and most importantly, ourselves. There is no time like today to change our way of thinking and move forward to a sustainable and balanced future.

"An invasion of armies can be resisted, but not an idea whose time has come", tells us, a favorite quote, and now, more than ever, it is obvious that the time has come for a conscious paradigm shift.

By accomplishing the construction of the center dome by spring 2012, we will be able to plan and host a whole series of workshops, that should and will be made available to even more people than ever before. Our "school of sustainability" series of workshops will have its own shelter.

The impact cannot be measured in words or numbers, but rather through the hugs, smiles and kind words that we receive from the people visiting and volunteering their time and energy to our project throughout the entire year.

By planting inside us, and inside them, seeds of change, we watch both them and ourselves, walk towards a healthier, freer future!

25 Days
Remaining

What We Need and What You Get!

The specific campaign is dedicated to nothing else but the construction of the central Geodesic Dome. The dome will be purchased by Pacific Dome International. The desired amount does not include the materials of a wooden floor that is not provided by Pacific Domes.

If the amount raised, is less than what needed, it will be saved until we manage to raise the entire amount from other possible sources, or even from running the campaign again.

Please see the unique perks we have created for you in return to donating to this campaign in our page in IndieGoGo by pressing [here](#) [www.indiegogo.com/free-and-real]

All the process of this, as of the entire project, will be posted in our websites and our social media.

Other Ways You Can Help...

If you are not in a position to help by donating money, don't worry, there are many ways to help us achieve not only this goal, but also the project as a whole.

Post this campaign on your favorite social media (facebook, twitter, etc) and hit the "like" button on our page at IndieGoGo

Send an e-mail to your friends and family letting them know about us.

Send us an e-mail letting us know what else you can offer (skills, tools, know-how, ideas etc)

Come visit us, work with us and lend us your hands to create a more sustainable future!

Thank you all for your support!
